THANKSGIVING SAFETY TIPS TO PREVENT FIRE

1. Never leave cooking food unattended: If something goes wrong when you are out of the room, things could escalate quickly.
2. Keep a fire extinguisher handy: It is important to have a fire extinguisher nearby to deal with any fires before they get out of hand.
3. Check the batteries in smoke detectors: Smoke detectors are no good if the batteries have died. When was the last time you checked yours?
4. Know how to handle grease fires: Grease fires are different than regular fires and cannot be extinguished quite as easily. You will need to smother the flame.
5. Avoid wearing loose clothing when cooking: Loose clothing can easily get too close to a burner and catch fire.
6. Avoid decorating the kitchen for Thanksgiving. Decorations, typically made of paper or cardboard are extremely flammable and do not belong near the stove.
7. Do not over achieve. Do not try and cook more than you can handle. This is when things can easily go wrong.
